EFFICIENT WAREWASHING SOLUTIONS

Benching not included

IM200

A compact multi-speed conveyor washes up to 130 baskets per hour and is particularly suitable for small to medium kitchens with constant workflow and soil changes. This compact conveyor will deliver up to 2,300 plates per hour with a wide range of accessories available. The Madison Series IM200 will give you punching power of a large rack conveyor in its unique and compact format.

Features

2 year parts and labour warranty

- The only Madison series machine to come with Norris's 2 year parts and labour warranty.

3 Wash Cycles Slow, Medium, Fast

- With 3 wash cycles this machine can process anything from lightly soiled plates to dirty baking trays.

Easily convert on site to left or right hand entry

- Can be easily converted to either a left or right hand feed, to suit the needs of your establishment.

Double skinned construction

- Double skinned construction to reduce both noise and heat emissions.

Easily convertible to a manual hood machine

- Can be easily converted into a hood machine

Self-Diagnostic system

- This machine is fitted with a self-diagnosis function for easy trouble shooting of problems. For a list of errors consult manual.

Pipe free wash chamber

- With its pipe free wash chamber the machine is easy to clean at the end of the shift leaving no places for bacteria to hide.

Standard 500mm x 500mm wash baskets

- With its standard 500 x 500 baskets it can use any basket from a standard under counter or upright dishwasher.

Thermostat Function to ensure set rinse temperature is achieved

- To ensure that your washed items are not only clean but sterilised this machine is fitted with a thermostat function so that the machine will only finish when the correct rinse temperate has been achieved.
